Spiritual Adoption

2nd MONTH – Developing Baby

Your baby is making progress developing all of his/her external features and internal organs. His/her brain is functioning at 40 days. His/her mother can hear his/her heartbeat now on an ultrasonic stethoscope. Milk-teeth buds are present at 6 ½ weeks. And it has been reported that a two-month old baby can suck his/her thumb. From this moment, your spiritually adopted baby grows and refines his/her body. But everything he/she needs to survive once he/she is born is already present by the end of the eighth week.
